Subject: St Elizabeth Church

Dear Planning Commission

My home is located near this church and have a enough traffic, noise, parking problem. Expanding this church only make problem bigger.

Expanding parking lots didn't make situation better. They still use street as their own parking lot. Little better than before, but bigger church only make parking problem bigger.

When they done with their service, their car streaming out their parking lot continuously. This make local traffic to stop.

They make many event and play loud music. They play within city limits. But even that is regal, repeating late night events annoy me very much. Can they limits events in their building, and close door?
